Introduction

1.1. Introduction to Project

The goal of this project is to create an online store where many bonsai plant species can be purchased. There are five web pages on this website. The areas are Home, Products, Blog, Research, and About Us. An initial skeleton of the website's design is built using Draw.io. Based on that framework, the website is then created using HTML, CSS, and JavaScript.

1.2. Goals and Objectives

The aim for this assignment is for the students to design and create a straightforward and appealing e-commerce website for bonsai plants. For this assignment, we must construct the following five pages: Home, Products, Contact Us, References, and Blog. The major objective of this project is for students to leave it knowing how to build user-friendly websites utilizing modern web design concepts. This project's goals and objectives are to demonstrate the following things:

- i. We are familiar with the principles of internet technology and are aware of how the internet affects current technology and how modern technology affects the way we live our daily lives.
- ii. We are conscious of usability and accessibility issues related to website design.
- iii. We know how to use HTML, CSS, and JavaScript to build websites.
- iv. We can build a simple website with the correct equipment and technology.
- v. The best way to maintain the folder structure has been discovered.

1.3. HTML, CSS and JavaScript

1.3.1. HTML

Hyper Text Markup Language is what HTML is. It is the industry-standard language for building websites. The website's skeleton is provided by it; all of the content is written in HTML. The most recent version of HTML is HTML5. HTML by alone is insufficient to build a completely functional website. To create a visually appealing and responsive website, CSS and JavaScript are required. HTML by itself is insufficient. To create a visually appealing and responsive website, CSS and JavaScript are required. The.html suffix is used to store HTML files on computers.

1.3.2. CSS

CSS, or cascading style sheets, is an acronym. The appearance of HTML elements on screens, in print, and in other media is specified by CSS. You can save time and effort by using CSS. It has the capacity to use an external CSS file to manage the layout of several web pages simultaneously. In addition to being utilized within HTML files and HTML tags, CSS may also be used within HTML files. Both of these are referred to as internal CSS and inline CSS. The.css file extension is used to hold external CSS files.

1.3.3. JavaScript

With the help of the computer language JavaScript, we can provide our web pages more sophisticated capabilities. A good website is interactive as well as doing more than just showing us information. This aspect of a webpage is handled by JavaScript. HTML and CSS may both be updated and modified using JavaScript. Additionally, it aids in data calculation, manipulation, and validation.

1.3.4. Use of HTML, CSS and JavaScript while developing website

While a website is being constructed, HTML is used to provide the structure. There are numerous tags used, such as div, image, a, span, table, meta, title, and many others. Each of these tags enabled the website's content to be written in the way it was intended. Similar styling for the homepage is achieved using CSS. Externally, internally, and inline are the three places where CSS is employed. CSS from other sources is used to style the bottom portion and the navigation bar. Internal CSS is used to style the body section. An element's style is applied via inline CSS. The class name and ID are used with CSS selectors to choose HTML components. CSS style properties like hover, margin, padding, text colour, and font size, background colour, and many more are utilized. CSS properties like hover, margin, padding, text colour, font size, and many more are used for styling. The division and the parts included within the division are both aligned using the flex properties. JavaScript is also used to give the website dynamic functionality and interactive features.

Examples of its use include pop-up messages, form validation, picture sliders, and accordions. It makes use of the concept of merging CSS, HTML, and JS and displaying it in a browser. JavaScript is used for validation.

1.4. Verdict

The project's needs plus my familiarity with HTML, CSS, and JS lead me to use them to build the website. These issues are crucial and quite important for current web technology. The required webpage content is written in HTML, which also gives the website its right form and structure. Similar to how CSS is used to style a page, making it more appealing by changing elements like colour, font, width, etc., is another example. Additionally, JavaScript is utilized to give the website dynamic behaviour and increase its interactivity. Web development is a massive and extensive subject and at the foundation of it lies HTML, CSS and JavaScript.

2. Discussion and Analysis

2.1. Sublime Text Editor

The text editor used to create the website is called Sublime Text. It is an effective text editor that is frequently used for coding. Working with code is made simpler by features like Syntax Highlight, Auto Indentation, File Type Recognition, Sidebar, Macros, Plugins, and Packages, to name just a few. Sublime Text is utilized as an integrated development editor, much like Visual Studio Code and NetBeans (IDE). It has an intuitive user interface. As a result, beginners will find it easier to operate. Sublime Text Editor 3.0 is the newest version that is currently available. Numerous operating systems, including MacOS, Windows, and Linux, are compatible with it. Sublime Text Editor is readily available for download from its official website.

2.2. Draw.io

Draw.io is a free online diagramming tool for creating charts and diagrams. You can use the software's automated layout option or design your own unique layout. They contain a big section of shapes and hundreds of graphic components that may be utilized to make diagrams and charts. The drag and-drop capability makes creating a professional-looking diagram or chart a breeze. We can make flowcharts, UML diagrams, entity relationship diagrams, network diagrams, mock ups, and more.

2.3. Home Page

2.3.1. Introduction to Home Page.

Home Page is the front page of this website. It starts with the name of the e-commercial store and the logo on the top of the website. By it's side, there is a navigation bar that lets users move from one page to another page with just one click as the other pages are linked through this navigation bar. At the bottom of the page, a footer section is placed. The navigation bar includes the logo with the brand name, "Flora Ecstasy". It also has the search bar with six different sections for other internal web page links. They are Home, Product, Blog, Research, About Us along with the Cart. There is an additional placement for navigation suggestion in the centre of the Home Page for the customers to check in with specifications directly. The tags used in this web page are: <meta>, <title>, <link>, <a>, <form>, <input>, <button>, <nav>, , <main>, <H1>,
, <H2>, <p>, etc.

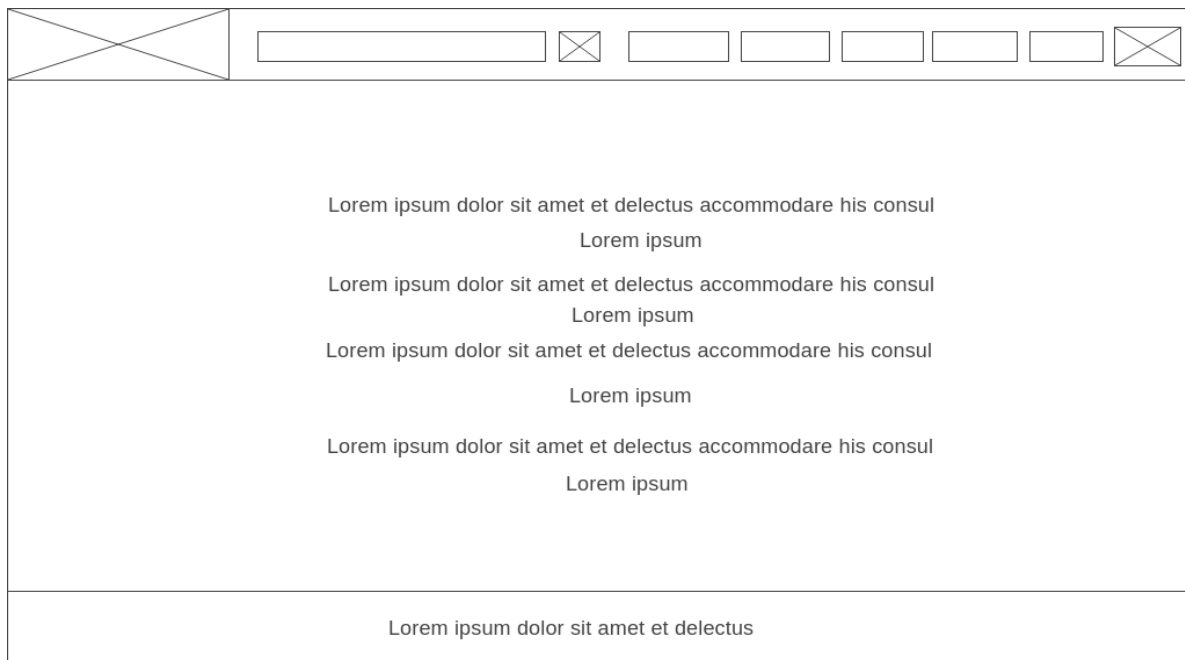

Figure 1: Wireframe of Home Page

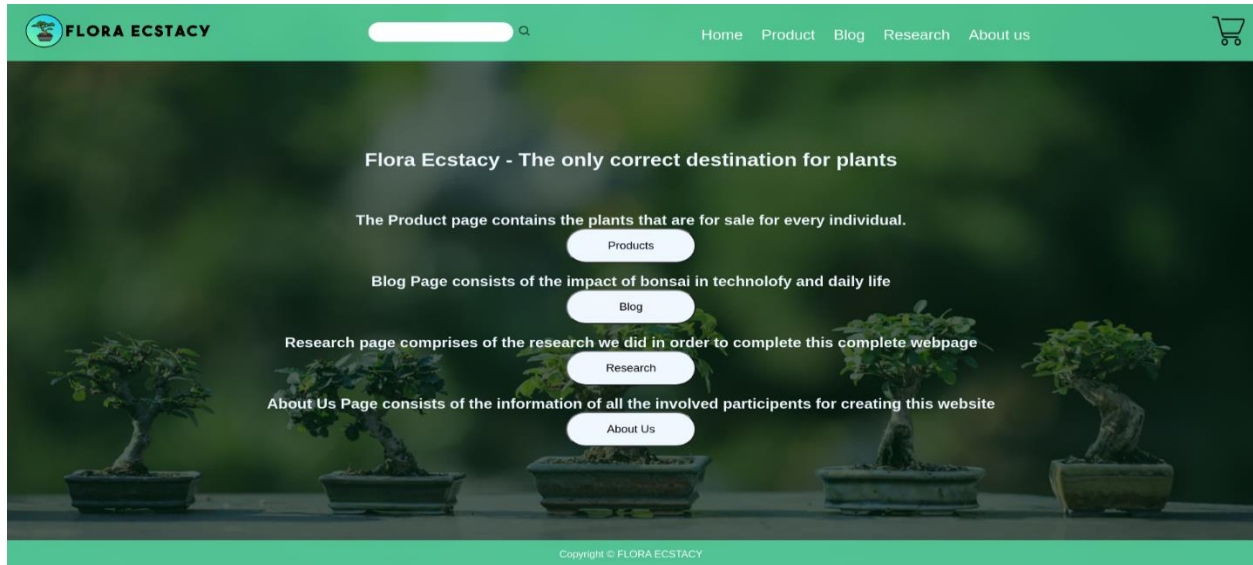

Figure 2: Home web page

2.4. Blog Page

2.4.1. Introduction to Blog Page

This page, like the others, includes a header with the site's logo, its name, and an advertisement. A navigation bar is also present, which facilitates navigating between the various website pages. This page is divided into four horizontal sections left aligned and one vertical section aligned right. On the left alignment section, there are three sections as, Introduction, The Impact of Bonsai Plants in Business, Impact of Bonsai Plants in Daily Life. After that, there is a concluding paragraph about the blog as conclusion. And on the right alignment, there is a brief summary of how the technology and business affects daily life with a picture on the top of it. The tags used in this page are:

<meta>,<title>,<head>,<div>,etc.

Introduction

Bonsai is a Japanese art form that involves growing and carefully pruning miniature trees in containers. The goal is to create a small, aesthetically pleasing tree that resembles a mature, full-sized tree in nature. Bonsai trees can be made from many species of plants, including conifers, deciduous trees, and evergreens.

Impact in business

Several ways that bonsai plants can benefit businesses include:

Decoration: Interior designers and landscapers frequently choose bonsai trees because they add visual appeal and can improve the decor of homes, offices, and other public spaces.

Gift market: The popularity of bonsai plants in the retail sector may be boosted by the fact that bonsai trees make wonderful presents for special occasions like birthdays, anniversaries, and holidays.

Education: Since bonsai trees instruct people about the art and culture of bonsai as well as the biology and ecology of trees, they can be used as educational resources in classrooms, museums, and botanical parks.

Tourist draw: Bonsai gardens and exhibits may be well-liked tourist draws that bring tourists to nearby businesses and stimulate the local economy.

Impact in daily life

In a number of ways, bonsai plants can improve daily life: **Relaxation:** Bonsai plants can have a contemplative, calming impact that can help with stress alleviation.

Air purification: By eliminating pollutants, lowering carbon dioxide levels, and creating oxygen, bonsai trees can assist to filter the air.

Exposure to plants and wildlife has been found in studies to raise mood, improve mental health, and lessen symptoms of anxiety and sadness.

Enhanced creativity: Taking care of a bonsai tree can be an outlet for creativity that enables people to explore their artistic side and produce a one-of-a-kind, living work of art.

Conclusion

In summary, bonsai plants are little trees raised in tiny containers. They are taught and trimmed meticulously to keep their small size and attractive attributes. They are a Japanese art form. In order to preserve their health and beauty, bonsai plants require special care, such as appropriate watering, pruning, and repotting.

Technology & Business

How technology has affected daily life and bussiness?

Technology has had a significant impact on daily life and business in many ways. In terms of daily life, technology has made many tasks easier and more convenient through the use of smartphones, laptops, and other devices. For example, people can now easily access information, communicate with others, and make purchases online. Technology has also changed the way we consume media, with streaming services replacing traditional cable and satellite television.

2.6. Research Page

2.6.1. Introduction to Research Page

Like the other pages, Research Page also contains the name of the store and the logo on the top of the webpage with the navigation by it's side. In this page, the research are also divided into five divisions as there are five different research. In each of the research, there is a screenshot of research and a screenshot of the output in this website. Also, there is a small description of the research below the screenshots. And at the end of the page, we have footer. The tags used in this page are:

<title>,<link>,<style>,<header>,<section>,<a>,<from>,<input>,<button>,<ing>,
,etc.

2.8.1. Introduction of Cart

Cart Page also consists of the header with logo, website's name, search bar and the navigation bar. This page also consists a footer in it's end. This Cart Page opens up the list of bonsai plants you choose to keep on your wishlist or the plants you want to buy online.

3. Testing

3.1. Test 1

Test Number	1
Objective	Hover effect on Product Page.
Action	<ul style="list-style-type: none">• Input of Hover effect on Product page in 'Add To Cart' using JavaScript.• Move the mouse cursor to the 'Add to Cart' button to check the effect.
Expected result	Mouse cursor to 'Add To Cart'- colour changes from white to blue.
Actual Result	The colour changed from white to blue when the mouse cursor was clicked to 'Add To Cart'.
Conclusion	The test was successful.

4. Conclusion

A workable, useful, and dynamic e-commerce website for the sale of bonsai plants that had at least five websites was what was required of us. The goals of this work were to demonstrate our fundamental knowledge of web development, HTML, CSS, and JavaScript, as well as our grasp of folder hierarchies and how to use web development tools to create a simple website. This website uses HTML, CSS, and JavaScript for each of its own roles to create a visually appealing, informative, dynamic, and responsive website. For designing the wireframe of this website, Draw.io was used.

This project's learning experience was genuinely quite instructive. We had to conduct our own research, and by doing so, as well as with the assistance of our teacher and friends, we were able to comprehend the fundamentals of web development while creating this website. This project helped us begin my journey in the limitless field of web development. We learned through our investigation that there are countless opportunities for web development. We are grateful for this project's contribution to our improved understanding of the web development industry.

      <section class="sectn">
        <h1 id="IOB">Introduction </h1>
        <p>Bonsai is a Japanese art form that involves growing
and carefully pruning miniature trees in containers. The goal is to
create a small, aesthetically pleasing tree that resembles a mature,
full-sized tree in nature. Bonsai trees can be made from many species of
plants, including conifers, deciduous trees, and evergreens.</p>
      </section>
      <hr>
      <section class="sectn">
        <h1 id="IIB">Impact in business </h1>
        <p>Several ways that bonsai plants can benefit
businesses include:<br>
          Decoration: Interior designers and landscapers
frequently choose bonsai trees because they add visual appeal and can
improve the decor of homes, offices, and other public spaces.<br>
          Gift market: The popularity of bonsai plants in
the retail sector may be boosted by the fact that bonsai trees make
wonderful presents for special occasions like birthdays, anniversaries,
and holidays.<br>Education: Since bonsai trees instruct people about the
art and culture of bonsai as well as the biology and ecology of trees,
they can be used as educational resources in classrooms, museums, and
botanical parks.<br>
          Tourist draw: Bonsai gardens and exhibits may be
well-liked tourist draws that bring tourists to nearby businesses and
stimulate the local economy.</p>
      </section>
      <hr>
      <section class="sectn">
        <h1 id="IIDL">Impact in daily life </h1>
        <p>In a number of ways, bonsai plants can
improve daily life:
          Relaxation: Bonsai plants can have a
contemplative, calming impact that can help with stress alleviation.<br>
          Air purification: By eliminating pollutants,
lowering carbon dioxide levels, and creating oxygen, bonsai trees can
assist to filter the air.<br>
          Exposure to plants and wildlife has been
found in studies to raise mood, improve mental health, and lessen
symptoms of anxiety and sadness.<br>
          Enhanced creativity: Taking care of a bonsai
tree can be an outlet for creativity that enables people to explore
their artistic side and produce a one-of-a-kind, living work of art.</p>
      </section>
      <hr>
      <section class="sectn">
        <h1 id="Conc">Conclusion</h1>
        <p>In summary, bonsai plants are little
trees raised in tiny containers. They are taught and trimmed
meticulously to keep their small size and attractive attributes. They
are a Japanese art form. In order to preserve their health and beauty,
bonsai plants require special care, such as appropriate watering,
pruning, and repotting.</p>

      <a href="#" class="Bonsai-title">How technology
has affected daily life and bussiness?</a><hr>
      <p>Technology has had a significant impact on
daily life and business in many ways. In terms of daily life, technology
has made many tasks easier and more convenient through the use of
smartphones, laptops, and other devices. For example, people can now
easily access information, communicate with others, and make purchases
online. Technology has also changed the way we consume media, with
streaming services replacing traditional cable and satellite
television.</p>

    </div>
    <p style="text-align: center;">
        <br><b>Product page</b><br>
        The following bonsai e-commerce page was inspired by Nike.com. As it has a
        simple and minimal interface with basic
        colors and fonts. This kind of format was eye-catching because as it is our
        first webpage we needed it to be simple
        yet realistic. However, the page has its own identity with different
        attributes with complement the overall theme of
        the bonsai theme. We tried out best to add our flare and concepts to the
        original inspiration.
    </p>
    <div class="DDD" style="display: flex;">
        <div class="abc" align="left">
            
        </div>

```

```

<div class="aaa" align="right" >
  
</div>
</div>
  <p style="text-align: center;">
    <br><b>homepage</b><br>
    FLORA ECSTACY is a ecommerce website where people can buy bonsai plants
at a very affordable price.
    The homepage of this website has a search bar and some other items that
are referenced from Youtube , one of the leading medias.
  </p>
  <div class="DDD" style="display: flex;">
    <div class="abc" align="left">
      
    </div>
    <div class="aaa" align="right" >
      
    </div>
  </div>
  <p style="text-align: center;">
    <br><b>Blog page</b><br>
    The blog page of the bonsai website is inspired by Medium.com.From the
layout to the structure of a blog page everything was combined with ideas of
the group with medium.
    Medium.com is a simple and interative website which is used by alot of
people that is the reason we used it as a refernce point for the blog page.
  </p>
  <div class="DDD" style="display: flex;">
    <div class="abc" align="left">
      
    </div>
    <div class="aaa" align="right" >
      
    </div>
  </div>
  <p style="text-align: center;">
    <br><b>About/Contact Us page</b><br>
    The "Contact Us" and "About Us" pages on our website provide important
information for
    visitors to understand who we are and how to get in touch with us. T
he design of these pages was inspired by the clean and simple layout of
Impact.com. However
    , we have added our own unique touch to make the pages reflective of our
brand and values.
    Visitors will find all the necessary contact details such as phone
number, email address,
    and physical address, as well as a brief overview of our company's
mission and values. W
e are committed to providing exceptional customer service and making it
easy for visitors
    to reach out to us with any questions or concerns.
